

GANESH KUMAR

 +91-9122855361 —  gannu9122@gmail.com —  LinkedIn —  LeetCode —  GitHub

SUMMARY

To enhance my technical skills in Computer Science, learn emerging technologies, and contribute to the development of innovative software solution.

SKILLS

- Languages: Python, C++, SQL
- Database Management System(DBMS)
- Object-Oriented Programming(OOPS)
- Developer Tools: VS Code, PyCharm

PROJECTS

1.Plagiarism Detection Using Python:

- Developed a plagiarism detection system using Python to compare textual documents and identify similarity scores.
- Developed and evaluated a plagiarism detection system on multiple datasets, improving detection accuracy and reliability.
- Applied Natural Language Processing (NLP) techniques to detect paraphrased content.

2.Student performance prediction system:

- Developed a machine learning-based system to predict student academic performance based on study hours, attendance, and previous scores.
- Implemented data preprocessing techniques including handling missing values, feature scaling, and encoding categorical variables.
- Developed and tested predictive models to improve prediction accuracy.

EDUCATION

- B.Tech (CSE): 2023-2027
Dronacharya Group of Institutions, Greater Noida, Uttar Pradesh
- Intermediate (12th): 2023
G.M.S.S High School, Madhubani, Bihar
- Matriculation (10th): 2021
Regional Secondary School, Madhubani, Bihar

ACHIEVEMENTS

- Active problem solver on LeetCode.
- Developed academic projects using Python and Machine Learning.
- Strong understanding of DBMS and OOPs concepts.

CERTIFICATIONS

- Python
- C++
